MATTEO MARRALE

Junior Producer & Project Manager | Game & Narrative Designer

Lonate Pozzolo (VA), Italy • matteo.marrale.1998@gmail.com • **linkedin.com/in/matteomarrale** • Driving licence B

PROFILE

Junior Producer & Project Manager and Game & Narrative Designer training at Digital Bros Game Academy in Milan (until summer 2027), with a narrative writing background from the first year of Strategic Writing & Screenwriting at AIV. Across 5 academic projects I have covered different roles — Game & Level Designer, Producer, Narrative Designer & Writer — on a 2D arcade game, a game jam, a Space Invaders twist, a casual mobile game and a first-person simulator. I design game systems without losing the thread of the story, and I work to scope and deadlines in multidisciplinary teams of up to 15 people.

SKILLS

Game Design: core mechanics, gameplay loop, level design, scoring & progression systems, playtesting, balancing & tuning, bug reporting
Narrative & Writing: narrative design, worldbuilding, character writing, dialogue writing (with triggers and word counts), diegetic tutorials, pitch storytelling
Production & PM: team coordination (up to 15 people), milestone planning, task management, cross-discipline communication
Tools: Unity (URP, New Input System), Unreal Engine, Figma, Miro, Jira, ClickUp, Notion, Google Workspace, Microsoft Office, Git basics
Documentation: GDD, pitch deck, beat chart, dialogue script, technical design docs, monetization & metrics specs
Languages: Italian (native), English B2 (self-assessed; GDDs and dialogue written in English)

ACADEMIC PROJECTS — DIGITAL BROS GAME ACADEMY

Antiques: The Last Owner — *Narrative Designer & Writer* May–Jul 2026

First-person restoration simulator with supernatural elements, PC, Unity (URP). 6 in-game days, 3 ghosts, 6 objects to restore. Team 02 of 14, released 3 July 2026.

- Narrative design of the core concept (object → ghost → regret → ritual), with a "funny with a human undertone" tone, woven into the gameplay loop.
- Wrote two of the three ghosts (Eleanor, a Victorian lady, and Anselmo, a medieval soldier) and their in-game dialogue in English, with triggers, word counts and notes for programmers.
- Beat chart for the 6 days and tutorial texts (IT + EN) delivered diegetically: each day introduces a mechanic without text tutorials.

One Hell of a Casino — *Producer* Mar–Apr 2026

Hell-themed casual mobile game (Android): mini-game collection, gacha system and simulated monetization. Team 02 of 15.

- Coordinated a multidisciplinary team (4 designers, 5 programmers, 5 artists) over 6 weeks, through to release.
- Managed milestones (Alpha 29/03, Beta 10/04, Release 24/04) and cross-discipline dependencies.
- Delivered on time with Android APK, pitch, walkthrough, promo art and technical documentation.

Cosmic Chaos — *Game & Level Designer, Balancing* Feb 2026

Space Invaders reimagined with a "twist" mechanic and enemy spawn patterns. "Shuffle" format: the project moves to another team every 5 days. Team 03.

- Co-wrote the GDD with the team and designed the twist and the enemy spawn and movement patterns (several enemy types, differentiated scoring, blocking object).
- Testing, bug reports and balancing analysis (difficulty curve, usefulness of elements), with tuning up to the final build.
- Pickup-and-continue: took over work started by other teams and handed off my own clearly.

What a Train — *Game & Level Designer* Jan 2026

1-week game jam — theme "origin of music", side camera, 26-second run, at least 1 mandatory diversifier.

- From brainstorm to playable prototype in 5 days: designed an experience compressed into 26 seconds, prioritizing and cutting features.

The Hunger of Nigishida — *Game & Level Designer* Nov–Dec 2025

Snake-like arcade game set in Sumerian mythology: top-down, 3 levels, scoring and power-ups. Team 02 of 8, first Unity project.

- Game and level design for one of the 3 levels; co-designed the score system, items (Beer, Speed Potion) and NPC rules.
- Wrote the GDD in English (core loop, mechanics, NPC behavior, level design, UI/UX, audio spec), carrying the Sumerian theme into every diegetic element.

EDUCATION

Digital Bros Game Academy — Game Design course, Milan Oct 2025 – summer 2027 (ongoing)
Design documentation, Unity prototyping, level design, mobile game design, project management, Unreal Engine, advanced system design, game audio, AR/VR.

AIV — Accademia Italiana Videogiochi — Strategic Writing & Screenwriting (first year completed), Milan Sep 2023 – Jun 2024
Story structure, character development and narrative analysis applied to games, film and TV.

Vocational diploma in Industrial and Craft Production — IIS "A. Ponti", Gallarate (70/100) 2020 – 2022

OTHER WORK EXPERIENCE

Airport Security Officer — I-SEC, Milan Malpensa Airport (Jun 2023 – Jul 2025): security procedures, attention to detail, shift-based teamwork. CNC Machine Assembler — Castek, Olgiate Olona (Oct 2018 – Mar 2019); school internships as a machine operator (2016–2017).

INTERESTS

Game design and critical analysis of games, narrative writing, comics, arthouse cinema, literature, philosophy, art history.

I authorize the processing of my personal data pursuant to EU Regulation 2016/679 (GDPR) and Italian Legislative Decree 196/2003.
